Make sure there is no gap at the lower place,  
and there is a gap at the higher place.

**【NOTIC】**

Pins do not through the whole!

b. Move the base mold  
to the right side and  
push the handle.  
There is no gap  
between molds.

**【NOTIC】**

Pins do through the whole!

### USE TIPS

#### ■How to use circle cutter

a. Adjust the cutter to the edge of  
round plate and fix it.

b. Press the axis of the round plate  
and turn around the cutter.

#### ■When should you use the big hexagonal wrench

The bigger hexagonal bolts are inside the both molds. Normally you don't need to adjust them only use wrench when they are loosen.

Hexagonal bolt inside

If you want to adjust these  
2 stoppers to get the  
correct position, you can  
rotate the base mold itself  
by hand.
